

MAYFIELD PARISH COUNCIL

HEALTH & SAFETY POLICY

Mayfield Parish Council (MPC) is committed to ensuring that Health and Safety is a priority in everything that we do.

Of paramount importance is the safety of our employees, residents, visitors (public) and contractors working on our behalf.

We will not make decisions that we believe will adversely affect the environment in which we live. We will consider the environmental impact of the things we do.

In promoting good Health and Safety we will ensure that we take the necessary safety precautions when organising events, completing community tasks or arranging for contract work to be completed.

Risk assessments will be prepared in line with the requirements of the Council's Insurance policy.

Risk assessments and safety guidelines for events organised by MPC shall be prepared, prior to the event taking place.

MPC will ensure that any contractors working on our behalf will have supplied the necessary HSE information, method statements and risk assessments before being allowed to perform any given task. The level of detail required for each contract will be proportionate to the risks and the size of the task being undertaken.

Contractors should themselves:

- Work within Health, Safety and Environmental laws
- Wear the necessary protective equipment required for the task
- Have the necessary training, knowledge and competence to perform the task
- Ensure they maintain suitable risk controls to protect members of our community and the public at large, during the contract works.
- Retain the necessary insurances for the tasks being performed.

Contractors who are not able to fulfil the above requirements will not be permitted to work on behalf of the council.

Contractors working unsafely will be asked to stop working immediately. If it is clear that they cannot perform the task safely then their contract will be terminated.
